Subject: VALCO/VALLEY TOOL & DIE, INC.-Certificate of Compliance with RoHS Directive

Our Valco Product Line currently has over 1300 active part numbers. All of these parts are compliant with the current revision of the European RoHS Directive (2011/65/EU).

All of our Stainless Steel products are RoHS compliant

- All of our Spring Steel products with Zinc and clear, blue, black or yellow Chromate finish are RoHS compliant using the Trivalent plating process.
- Although some of our steel inserts and steel solid studs are machined from leaded steel bar stock, the Annex of the RoHS directive currently exempts this application of lead up to a maximum of 0.35% by weight.

To the best of our knowledge, none of the other banned or restricted substances listed in the RoHS directive are present in any of our products.

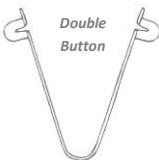

Sincerely,

Adolf Eisenloeffel
